

Evergreen accident

Date of incident : March 13, 2022

Location: [Chesapeake Bay](#) in Maryland

Overall:

The container ship **Ever Given** (operated by Evergreen) became wedged across the Suez Canal in March 2021, causing a massive six-day blockage of one of the world's most vital trade arteries. The incident had a cascading effect on global supply chains and resulted in billions of dollars in losses and significant logistical disruptions that lasted for months.

The Incident

- **Date and Cause:** The 400-meter-long (1,312 ft) ship ran aground on March 23, 2021, amid a sandstorm and strong winds, which made it difficult to steer. Human error, including potentially incorrect commands and speeding, was also cited as a contributing factor.
- **The Blockage:** The vessel became wedged diagonally in a single-lane stretch of the canal, completely halting traffic in both directions. A salvage operation involving tugboats and dredging efforts worked around the clock, finally freeing the ship on March 29, 2021, aided by a high spring tide.
- **Scope:** By the time the ship was freed, over 400 vessels were queuing at both ends of the canal, including container ships, oil tankers, and bulk carriers, with an estimated \$9.6 billion worth of goods delayed each day.

Cause:

It happen because human error based on incident logs The pilots reportedly gave a series of aggressive steering and speed commands that were counterproductive in the narrow canal, ultimately causing the ship to lose control and run aground also there Strong Winds and Sandstorm , The initial official explanation from the ship's technical manager and the SCA was that the ship was caught in a strong crosswind and a dust storm

What I got :

sometime your ego is not make everything better do not be like captain listen to the facts, communicate effectively, set ego aside, and follow the *right* rules of safety and best practice, especially when facing challenging conditions.
